

GAIM™

VR TRAINING MODULES

We have reached a milestone in shooting simulation systems. Digital shooting has never felt more realistic. The groundbreaking technology of the GAIM Virtual Reality Simulator gives professionals the possibility to practice shooting and strategy in an authentic, immersive and flexible way.

Get ready to simulate in stunningly realistic environments developed with professionals to ensure relevant training scenarios. The hit zones replicate those that are used in real situations and the shooting techniques are in accordance with what is recommended by professional shooting instructors. The use of Aimpoint® sights gives you the opportunity to experience the concept of shooting with both eyes open.

The GAIM Virtual Reality Simulators are tailor made complete kits, including hardware and software. They are truly compact, transportable and easy to setup, either in small spaces or up to 10x10m, allowing up to three participants to wirelessly and simultaneously cooperate. GAIM delivers an exceptionally unique and cost effective solution, yet maintaining top notch quality.

Hardware

We've tested systems and worked with industry-leading manufacturers to bring you a GAIM computer ready for the most impressive virtual reality experience right out of the box. From graphics cards and processors to memory and storage space – these computers deliver a superior VR experience thanks to superior components. The computer is installed with state of the art GAIM VR system and Steam VR. TeamViewer is installed to allow remote maintenance if necessary.

VIVE PRO VR SYSTEM

VIVE Pro delivers the highest realism, clearest audio and most immersive VR experience. VIVE Pro was ergonomically engineered to provide maximum comfort and flexibility. Hi-Res headphones and 3D spatial integration with a built-in amplifier offers true-to-life audio with increased volume and resonance. Plus, environmental noise cancellation delivers an immersive experience without distractions from real-world noise.

Integrated virtual reality rifle AR-15

GAIM has custom tailored the new AR-15 VR rifle to be used in the scenarios but can also offer other weapon systems.

Software

The system is delivered with pre-installed tactical scenarios. These simulations include a Middle East City with insurgents, a urban/city center police scenario, an attack in a subway platform, and a domestic room clearing/hostage scenario. Additional scenarios are available and GAIM can customize scenarios to fit your training needs. With GAIM OS, new scenarios can be purchased and added instantly ensuring the system is always bringing relevant training.

Features include:

- AI functionality allowing fully randomised behaviour by opponents
- Fully randomised environment set-up to make sure the exact same scenario isn't trained twice
- Multiuser scenarios
- Instructor mode where the instructor can control the events in the scenarios
- Voice commands allowing the user to interact with opponents in the environment
- De brief section allowing the instructor and trainee to review and reflect after each training session
- Statistics allowing the trainee to track progress and improve where needed
- Anatomically accurate hit analysis including pre and after shot review of barrel movement
